

# IS ESSENTIAL

As states and provinces move to temporarily close nonessential businesses, the importance of hardware stores, home centers and lumberyards continuing to serve our customers cannot be denied.

In our area, home improvement stores have been considered essential by local lawmakers. Our business will continue to serve your needs safely and reliably—just as we have done for years.

## This store supports your security.

We carry essential products to protect your property. From nails and screws to HVAC supplies and locks, you can count on your local independent.

## This store keeps your family safe and healthy.

We sell cleaning supplies, first aid kits, nonperishable food and more to help families prepare for the future.

## This store powers the local economy.

Construction is also considered essential, and home improvement stores carry supplies the industry needs to keep building.
